FREEZE DRIED FRUIT

FREEZE-DRYING is a highly effective cold dehydration process for the production of ready-to-eat products, which retain all their nutritional properties and physical characteristics (structure, flavor, color and aroma), with a shelf life of up to two years and without the use of artificial additives or preservatives.

DIVERSITY, SUSTAINABILITY AND INNOVATION

- Tropical and exotic fruits of 100% colombian origin
- Foods with a long shelf life, without additives or preservatives that maintain 99% of their physical and nutritional properties.
- Products of the highest quality that facilitate their transport, optimize spaces and save time
- Ideal for exports, food industry, pharmaceutical, hotels and restaurants its nutritional and organoleptic properties

ADVANTAGES

Time optimization

Flavors, textures and innovative mixes

Long shelf life of fruits and vegetables

Does not require a cold chain

Minimize costs, increase efficiency
