

SUGAR CANE PANELA CATALOG

DATA SHEET

DETAIL	DESCRIPTION
Sugar cane Panela	Product obtained by evaporation and concentration of cane juices
Physical description	Product based on sugar cane juice, soluble in water, light and dark yellow in color with a characteristic flavor and odor.
Texture	Firm and hard consistency, determined by the concentration of sucrose crystals in relation to the reducing sugars formed in its process.
Raw material	Natural sugar cane juice (<i>Saccharum officinarum</i>), from the southern Colombian production area, laurel wax (<i>Laurus</i> sp.) and natural extract from the bark of Balso (<i>Heliocarpus</i> sp.) which is a vegetable mucilage, used as a clarifying agent.
Product Legislation	Its production is regulated by Law 40 of 1990, which is enforced by the National Federation of Panela Producers FEDEPANELA. This law also includes the payment of a "panel promotion fee" that corresponds to 0.5% of the final sale value for each arroba of sugar cane panela (24 pounds). There is also resolution 0002546 of 2004, on regulation for the production, transportation and marketing of sugar cane panela, which is in the approval process.
Storage	Store in a dry place, without humidity, away from chemical products and detergents.
Shelf life	12 months from the packaging, consume as soon as possible the date of manufacture in good storage conditions, after opening ble.
